

A standard service fee can be anything but standard. The truth is: When those other guys charge low service fees, they're not even covering the expense of sending someone out to your house. Then their technicians upsell you to recoup those costs. You might pay a lower service fee upfront, but you're stuck paying additional fees and surcharges.

SERVICE CALLS

When you pay a diagnostic fee to Capital Heat, you're paying for travel, diagnostic, repair, and a full system cleaning post-repair—unlike other guys who charge low prices just to get their foot in the door.

Capital Heat: \$139* | Other Guys: \$89

INCENTIVE TO UPSELL

Other guys do work on commission—and their service fees don't even cover their expenses—so they have every incentive to charge you for products and services you may not actually need.

Capital Heat: \$0 | Other Guys: UPCHARGE

INCLUDED TIME

Our technicians take no more than five service calls a day, ensuring that they have enough time to properly diagnose the issue and/or perform the repair on the spot.

Capital Heat: 1 hour | Other Guys: UPCHARGE

COMMISSION

Our techs don't work on commission, so they have nothing to gain other than solving your problem and providing the best service possible.

Capital Heat: \$0 | Other Guys: UPCHARGE

At \$139, you're not just paying for service—you're paying for peace of mind!
*\$139 diagnostic fee applies to standard service performed Monday through Friday.
